T-FIGHT

ULTIMATE ALL-AROUND PERFORMANCE

The new T-Fight Isoflex range is designed to allow players to unleash their full potential by incorporating two innovations from the TecniLab: RS Section and Isoflex, generating a specific sensation of dynamic control. The RS Section represents the fusion of the classic "square" and "round" frame sections to create a unique 5-sided geometry, producing the ideal balance between power and control. The Isoflex technology is an adaptive frame stiffness system, generating an overall consistent stringbed for the same power and precision on centered and off-centered hits for maximum playability and stability.

Grip 2: 14FI270I32

TF40

EXTREME PRECISION

A competitive player's frame that boasts ultimate feel and control. Featuring a thinner, foam-filled beam and incorporating TecniLab's RS SharpSection, the TF40 allows for more frame deformation at ball impact, helping players carve and place their shots around the court with extreme precision. The foam inside the frame helps absorb vibration and provides a comfortable feel, and the XTense BG's represent wider and longer grommets for enhanced string elasticity and more tolerance.

TF-X¹

POWER HAS A NEW FEEL

The TF-X1 packs all the power you desire into a stable, comfortable frame. The rounder head-shape combined with our proprietary Isoflex technology provides a larger sweetspot, which is enhanced by the adaptive frame stiffness system and creates a consistent feel on impact anywhere on the string-bed. The TF-X1 also features our innovative X-Damp technology, which targets and alleviates low frequency vibrations for ultimate comfort and lasting player performance.

TEMPO

MADE FOR SPEED

Designed specifically for World #1 Iga Swiatek, Tempo is focused primarily on speed, maneuverability and playability in a player's performance frame. Featuring a quick swing-weight and combining attributes from our other racquet families, the Tempo allows players to swing freely and control the point with an ideal mix of power, control, spin and feel, making it a versatile racquet for various player types.

RAZOR SOFT

INTRODUCING RAZOR SOFT

A high performing polyester used by Grand Slam Champion Daniil Medvedev. Constructed with the same high-modulus polyester materials as Razor Code, and by melting a poly-urethane additive to the core, Razor Soft retains the same precision and tension maintenance while adding a new dimension of flexibility and comfort.

The wait is finally over for a high-performance polyester that brings comfort without sacrificing precision.
